

**Como fazer com que suas  
fotos sejam reconhecidas  
como mídia em Destaque, de  
Qualidade e Valor no  
Wikimedia Commons**

**Mike Peel**

# Mídia em Destaque, de Qualidade e Valor

Featured media: 'wow' factor + very high quality (max 2 candidates under discussion)

Quality images: very high quality, well composed (max 5/day).

Has to be the best quality from the camera used (not compared to best cameras!)

Valued images: the most valued illustration of its kind

Aim for encyclopaedic/educational images: Artistic is good but doesn't always help, focus on documenting what you see.

(Also Featured Media for video etc, but not working too well right now...)

If you're submitting to wiki photo competitions, going through Quality Images lets you check that you're entering the best version to the competition

# Featured has to be high quality and 'wow'

Nearly everything has to be perfect: highest quality, with a 'wow' factor, need high quality camera + timing

File:At Paraty 2023 080 - High tide at Rua da Praia.jpg

File:At Tenerife 2022 085 - Gallotia galloti (cropped).jpg

# Você não precisa da melhor câmera para **Qualidade**

Museu Paulista

iPhone 5 (old!)

Quality Image

File:Museu Paulista  
Backstage Pass 2018  
171.jpg

# Valued images don't have to be high technical quality

Zebu, tall ship constructed in 1936

Photographed in 2013

Ship wrecked in 2021

Photo is not sharp, but the best we have

Can't take a better one now!

Valued image

File:Zebu in front of the Albert Dock  
warehouses 1.jpg

# Todas as partes são importantes!

ESTE ESPAÇO FOI OCUPADO, ORIGINALMENTE,  
POR UMA PLACA DE BRONZE COM UMA  
REPRESENTAÇÃO DA PRIMEIRA MISSA EM SÃO  
PAULO. A PLACA FOI FURTADA EM 2004 E, DEVIDO  
À INSUFICIÊNCIA DE REGISTROS, NÃO FOI  
POSSÍVEL REPRODUZÍ-LA.

## Monumento aos Fundadores de São Paulo

# O pós-processamento é importante

Quality Images process looks for high quality

Need to e.g.:

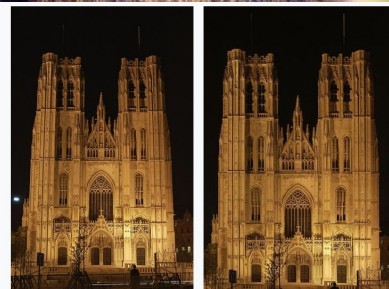

- Fix Chromatic Abberation
- Correct white balance
- reduce noise / sharpen
- Tweak brightness, highlights, etc.
- Vertical/horizontal alignment

etc.... Listen to feedback from reviewers + iterate + learn!

[https://commons.wikimedia.org/wiki/Commons:Image\\_guidelines/pt](https://commons.wikimedia.org/wiki/Commons:Image_guidelines/pt)

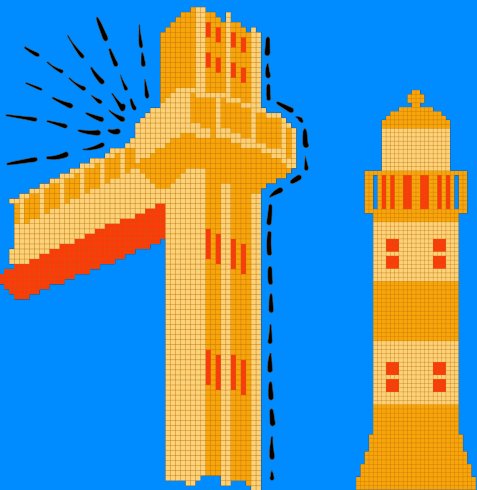

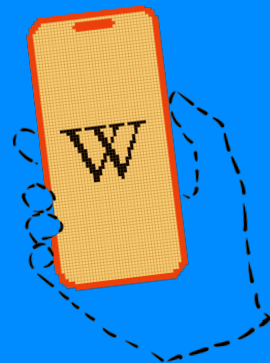

I use Lightroom, but Darktable can also do this, or Snapseed on mobile

Upload full resolution (minimum is 2 megapixel), don't upscale!

⊖ Distorted  
perspective.

⊕ Perspective  
corrected.

Obrigado(a)
